

Obbi, Luxo

External automations
for swing gates

ENG

Advanced entrance technology

External automations

Great care is required at the design stage of automations used on swing gates, as the gates are exposed to bad weather and are often very frequently used.

In order to offer the best possible solution, when designing the automation system, it is crucial to know exactly how the gate will be used.

DITEC offers a full range of products designed to allow easy installation on gates of any size and to cater for any type of duty.

Product range

Medium duty

Obbi 3BH - Obbi 3BFCH

Heavy duty

Luxo 3B - Luxo 3BH
Luxo 4BH - Luxo 5B - Luxo 5BH - Luxo 5VBH

Distinctive features of models offered

Description:	OBBI 3BH	OBBI 3BFCH	LUXO 3B	LUXO 3BH	LUXO 4BH	LUXO 5B	LUXO 5BH-5VBH
Electromechanical actuator	irreversible for up to 3 m wide wing	irreversible for up to 3 m wide wing	irreversible and reversible for up to 3.5 m wide wing	irreversible for up to 3.5 m wide wing	irreversible for up to 4 m wide wing	irreversible and reversible for up to 5 m wide wing	irreversible for up to 5 m wide wing
Travel control system		magnetic mechanical stop	lever-operated mechanical stop (optional)	lever-operated mechanical stop (optional)	lever-operated mechanical stop (optional)	lever-operated mechanical stop (optional)	lever-operated mechanical stop (optional for 5BH)
Maximum capacity	250 kg x 1.5 m 150 kg x 3 m	250 kg x 1.5 m 150 kg x 3 m	350 kg x 2.5 m 250 kg x 3.5 m	300 kg x 2.5 m 200 kg x 3.5 m	350 kg x 2.5 m 200 kg x 4 m	500 kg x 3 m 250 kg x 5 m	500 kg x 3 m 250 kg x 5 m

Obbi

▶ Elegant design and versatile applications

Gates for residential application often require an automation able to ensure long lasting, highly reliable gate operation, as well as to perfectly blend in with the look of the gate.

Obbi's smart yet simple design fully meets these requirements and can also be used with any type of modern or period gates.

Its very thin frame blends in exceptionally well with the frame of the gate and ensures easy installation thanks to its special connecting system, which may be fixed without welding, if so required, and to its multi-hole rear bracket, easily

adjustable to be located in the most suitable operating position by simply changing the through hole combination.

In the event of a power failure, the automation can be manually operated by using the key operated release system or automatically operated if a control panel with battery has been installed.

▶ Distinctive features

- ▶ High safety level ensured by the 24 V DC power supply
- ▶ Smart yet simple design
- ▶ Anodised aluminium shaft cover
- ▶ Suitable for any modern or period gate frame
- ▶ Can be used to operate gates with small pillars
- ▶ Easily accessible key-operated release system
- ▶ When VIVA H control panel is used, the following facilities are available: part opening, speed adjustment, soft start and soft stop

Special accessories

- ▶ Back-up battery pack to be used in the event of a power failure

OBBI operation diagram and chart

A	B	C max (90°)	D max	E	L
150	150	85	100°	75	910
120	160	95	100°	75	910
120	180	115	110°	75	910
160	120	55	110°	75	910

Luxo

▶ The privilege of beauty. Sturdy, durable and heavy duty

Smart and refined, Luxo was designed to be admired and desired.

Its modern and futurist look features soft and smooth lines and makes it suitable for any type of gate frame.

The automation has been designed to comply with the sturdiest and most reliable DITEC systems.

Being made of aluminium, it looks light and clean; this will ensure its long life,

withstanding harsh weather, and is further enhanced by an additional polyester coating.

Every detail and shape has been carefully and passionately designed.

▶ Power failure? No problem!

Thanks to its manual release system, located under its smart and easily accessible plastic cover, all emergencies caused by power failure can be easily overcome.

▶ Easy installation

Under the upper casing all electric connections are neatly gathered to make both installation and maintenance easy and quick.

- ▶ Irreversible or reversible, customer specified
- ▶ Version with dustproof brushes and limit switch as standard
- ▶ Version with 24 V motor, partly open, speed adjustment, soft start and soft stop

▶ Total life time reliability

System and power connection cables are located in a specially designed raceway to avoid scratching, torsion and wear during operation, thus preventing any possible damage.

Brackets are made of galvanized steel while rotation bushes are made of hardened steel to ease the movement of the automation and to avoid wear and tear.

Special accessories

- ▶ Limit switch unit
- ▶ Electrically operated locks
- ▶ Back-up battery pack to be used in the event of a power failure

Luxo

External automations for swing gates

Smartly designed, details included

All fixing screws are made of stainless steel to be weatherproof and to preserve the beauty of the whole automation system over time. However, they are intentionally and cleverly hidden by the designer's attention to detail.

Sturdy, durable and reliable, it works quietly to be admired and desired.

Find out more about its special features and functions in the technical specifications table.

Accessories

The wide range of DITEC accessories offers access system fitted with several types of control and monitoring devices.

GOL 4 transmitters

Featuring four channels and fixed code and cloning option, or rolling code. Certified and compliant with current standards. Transmitter mountings: smartly designed, they can be fitted on any type of surface: from the car dashboard to a wall in the garage or in the house. The remote control can be stored in its practical housing and is always ready for use.

Xel 2 and Lab 3 infrared sensors

These sensors allow the automation to be operated with the highest levels of safety. Can be mounted directly on a wall or on its own mounting. Modulated infrared beam. The sensors are also suitable for applications where space is at a premium.

Xel 5 key operated selector switch

Fitted with a tamper proof or vandal resistant device. Can be mounted directly on a wall or on its own mounting.

Sof safety edges

These are fitted to all entrance control systems to ensure maximum safety during opening and closing operations.

Lan 4 digital combination systems

With digital vandal resistant combination keyboard. Up to 8 digit PIN number.

Lamp H

24 V flashing light with flashing operation controlled from the control panel.

GOL 4M keyboard operated transmitters, with digital combination

Coded four-channel control. Allows radio controlled motorised gates to be opened by entering a code. Wall mounted.

Lan 7 control system with proximity control

Remotely operated identification system featuring TRANSPONDER technology. Allows identification without the need for a touch-controlled device.

When building the system, only use DITEC accessories and safety devices.

DITEC automations all feature CE marking and are designed and built in compliance with the safety requirements of the Machinery Directive (2006/42/EC), of the Electromagnetic Compatibility Directive (2004/108/EC) and of the Low Voltage Directive (2006/95/EC) and of other Directives, laws, specific standards for special products and situations.

DITEC S.p.A. reserves the right to make changes which may improve the products. DITEC S.p.A. always strives to improve its products. For this reason, the technical details featured in this catalogue are not binding.
